

PCET 2014: Second International Conference on Proton-Coupled Electron Transfer

June 15-19, 2014

Skokloster Wårdshus

Uppsala, Sweden

PCET is an important fundamental reaction that has sparked the interest of the chemical, biological, and physical scientific communities for its ubiquity in natural and artificial systems. The Second International Conference on PCET will bring together research from the areas of enzymatic, catalytic, surface, and theoretic frontiers. This conference will be the ideal setting for researchers of all levels to participate in discussions about contemporary issues in the field. The schedule will include keynote lectures from top researchers in the field, focused research talks, and three poster sessions. The conference will take place at Skokloster Wårdshus, next to the historic Skokloster Castle, which can be conveniently reached from Stockholm/Arlanda International Airport. We look forward to seeing you in June!

Leif Hammarström, Chair (Uppsala University)

Starla Glover, Co-Chair (Uppsala University)

International committee:

Ally Aukauloo (Université Paris-Sud)

Christopher Chidsey (Stanford Univeristy)

Cyrille Costentin (Université Paris Diderot)

Sharon Hammes-Schiffer (University of
Illinois at Urbana-Champaign)

James M. Mayer (UW, Seattle)

Thomas J. Meyer (UNC Chapel Hill)

Marc Robert (Université Paris Diderot)

Justine P. Roth (Jonhs Hopkins University)
