

French Conference on Catalysis

Fréjus, Var, French Riviera, 2016 May 23-27th

<http://fccat.sciencesconf.org/>
Second announcement

Invitation

Catalysis plays a pivotal role to tackle the major challenges in energy, environment and chemistry. In 2016, the French Catalysis community is glad to be the host for the French Conference on Catalysis. This event will be the occasion, for the French and the International homogeneous and heterogeneous Catalysis communities, to share most advanced results as well to promote synergies between the different fields in a convivial atmosphere. We look forward to welcoming you at FCCat.

On behalf of the organizing committee: H. Olivier-Bourbigou and C. Chizallet

Program

The scientific program will be organized as a **single session**, with invited lectures and contributed oral presentations completed by poster sessions. Part of the program will be devoted to **Industry/Academia/Young Researchers interactions**.

Submissions are now open !

(1) Create an account at:

<http://fccat.sciencesconf.org/user/createaccount>

(2) Prepare your abstract according to the template provided in the course of the submission process, at:

<http://fccat.sciencesconf.org/user/submit>

Deadline for abstract submissions:

December 11, 2015

Notification of acceptance: January 29, 2016

Scientific program available: February 12, 2016

Invited Speakers

Main topics

Fields :

Heterogeneous catalysis, homogeneous catalysis, hybrid approaches and multi-catalysis

Methods:

Preparation, characterization, kinetics, modeling, testing methodology, catalytic process development

Applications:

Conversion of fossil and renewable feedstocks for chemistry, refining, environment, energy

Prof. A. Brückner
Leibniz Inst., Rostock, Germany
Operando spectroscopy in catalysis

Prof. X. Carrier
LRS, UPMC, Paris, France
Model approach for catalyst preparation

Prof. F. Cavani
Bologna Univ., Italy
Catalysis for renewables: from bio-alcohols to chemicals

Prof. C. Claver
URV, Tarragona, Spain
Nano- and homogeneous catalysis

Dr. V. Harlé
Solvay, Aubervilliers France
Catalysis for automotive depollution

Dr. T. Schaub
CaRLa, BASF, Heidelberg Germany
Innovation in homogeneous processes

Prof. V. Van Speybroeck
Ghent Univ., Belgium
Ab initio kinetics in nanoporous catalysts

Dr. A. Travert
LCS, ENSICAEN, Caen, France
Operando spectroscopy, refining catalysis

French Conference on Catalysis

Fréjus, Var, French Riviera, 2016 May 23-27th

<http://fccat.sciencesconf.org/>

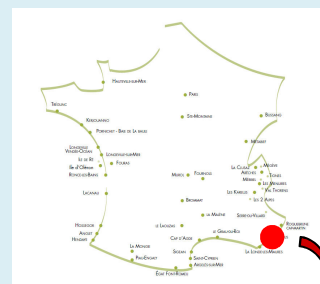

Practical information

Dates : May 23rd (3 pm) - 27th (noon) 2016

Venue:

The conference will take place at **Azureva holiday center** at Fréjus, on the **French Riviera** (Highway A8, exit n°38). Transfer by **bus shuttles** will be organized from (on the 23rd) and to (on the 27th) the following places:

- **Saint-Raphaël-Valescure train station** (about 15 minutes from Fréjus, TGV connections with Marseille, Paris, Lyon)
- **Nice airport NCE** (about 45 minutes from Fréjus)

Full accommodation is provided on-site and is included in the conference fees:

<i>Fees are given in €</i>	Before March 4th 2016	After March 4th 2016
Academic, SCF/EuCheMS member (single)	540	650
Academic, non SCF member (single)	590	710
Industry, SCF/EuCheMS member (single)	700	840
Industry, non SCF member (single)	750	900
Student, SCF/EuCheMS member (single)	370	450*
Student, SCF/EuCheMS member (double room)	320	390
Student, non SCF member (single)	420	510*
Student, non SCF member (double room)	370	450

*subject to availability

Registrations will soon be open !

- (1) Create an account at: <http://fccat.sciencesconf.org/user/createaccount>
- (2) Register at: <http://fccat.sciencesconf.org/registration/index>

Payment by credit card, bank check or invoice will be accepted.

Sponsors and exhibitors are welcome
