SECOND CIRCULAR

On behalf of the Organising Committee, it is our great pleasure to invite you to attend the 28th International Conference on Organometallic Chemistry (**ICOMC-2018**) which will be held from **15th to 20th of July 2018** at the Congress and Exhibition Centre in the heart of the City of Florence, Italy, organised by the Institute of Chemistry of Organometallic Compounds (**ICCOM**) of the Italian National Research Council (**CNR**), in association with the official PCO of the event, Adria Congrex Srl.

The Conference comes back to Italy after 30 years (Turin 1988) as a part of a series of biannual events with a long tradition. **ICOMC 2018** will provide a unique opportunity to present and disseminate all the main aspects of modern organometallic chemistry in a lively, multidisciplinary and modern environment. Companies are welcome to support the Conference by various kinds of Sponsorship and will find exhibition space and other opportunities to advertise their products and activities.

The scientific program will be organised in parallel Lecture Sessions, focused on different aspects of traditional and emerging areas of organometallic chemistry and related applications. Student attendance will be encouraged by reduced fees and giving the possibility to showcase their results during two Poster Sessions and Flash Presentations. Top poster contributions will be shortlisted for Poster Prizes.

We look forward to meeting you in Florence for this exciting scientific event.

Best wishes,

Maurizio Peruzzini, Chairman
Alessandro Mordini, Co-Chairman
Luca Gonsalvi, Scientific Secretary

Main Topics

Asymmetric Synthesis by Organometallics
 Bio-Organometallic and Medicinal Chemistry
 Clusters, Coordination Polymers and MOFs
 Early, Late Transition Metal and F-Block Organometallics
 Green Chemistry and Catalysis
 Main Group OM Synthesis
 Mechanisms, Structure and Bonding, Calculations
 Polymerisations, Materials and Nanomaterials
 Supramolecular Chemistry and Molecular Machines

Minisymposia

Challenges in CO₂ Activation and Utilisation
 Photovoltaics and Photoactivated Chemical Processes
